## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Robin Reasoner on November 9<sup>th</sup>, 2007.

The application has been amended as follows: claim 1 should now read:

A display system comprising:

a display surface having a three-dimensional convex shape; and

a projection system for projecting an intermediate image at an object field, the intermediate image to be passed through a lens system, onto a continuous image field on an interior of the display surface, wherein the projection of the intermediate image on the continuous image field is substantially in focus on the interior of the display surface, and wherein a ratio of a longest image distance to a shortest image distance is at least 1.75, and an image distance at an apex image point is longer than an image distance at a full field image point.

### ***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance: independent claim 1 is the only independent claim in the application. While some limitations of claim 1 are taught by individual parts of various display systems, the design and operation of

these various systems necessarily preclude the joining of their parts to fulfill all of the limitations of claim 1. As such, no prior art either singly or in combination teaches all of the combined requirements of claim 1.

Specifically, no prior art alone or combination discloses, that a projection system project an intermediate image onto a continuous image field, that the projection is substantially in focus, that the ratio of the longest image distance to the shortest image distance is at least 1.75, and that the image distance at an apex image point must be longer than the image distance at a full field image point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William L. Boddie whose telephone number is (571) 272-0666. The examiner can normally be reached on Monday through Friday, 7:30 - 4:30 EST.
